Please find below and/or attached an Office communication concerning this application or proceeding.

		Application	on No.	Applicant(s)					
•		10/600,86	06	HERREN, THOM	IAS R.				
	Office Action Summary	Examiner	r	Art Unit					
		Phi D. A		3637					
	The MAILING DATE of this communi	cation appears on the	e cover sheet w	ith the correspondence a	ddress				
Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filled after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filled, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).									
Status									
2a)□	Responsive to communication(s) filed on <u>15 August 2006</u> . This action is FINAL . 2b) This action is non-final. Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.								
Dispositi	on of Claims								
4) Claim(s) 1-20 is/are pending in the application. 4a) Of the above claim(s) 5-8,10,12 and 17-20 is/are withdrawn from consideration. 5) Claim(s) is/are allowed. 6) Claim(s) 1-4,9,11,13-16 is/are rejected. 7) Claim(s) is/are objected to. 8) Claim(s) are subject to restriction and/or election requirement. Application Papers									
	-								
 9) The specification is objected to by the Examiner. 10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152. 									
Priority u	nder 35 U.S.C. § 119								
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received. 									
2) Notice 3) Inform	e of References Cited (PTO-892) e of Draftsperson's Patent Drawing Review (P' nation Disclosure Statement(s) (PTO/SB/08) r No(s)/Mail Date	TO-948)	Paper No	Summary (PTO-413) (s)/Mail Date Informal Patent Application					

Election/Restrictions

Page 2

1. Newly submitted claim7-8, 10, 17-20 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the claims are to the species not elected.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 7-8, 10, 17-20 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claims 5-6, 12 are withdrawn as submitted by applicant.

Claims 3-4, 9, 11, 13-16 have been rejoined with the previously elected claims 1-2.

Although claims 7-8, 10, 17-19 are amended claims, they are newly considered as requested by applicant and is found to still be restrictable as to read on non-elected species.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-4, 9, 11, 13-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Herren (6260318) in view of DiGirolamo et al, Hatzinikolas (5313752) and Tellenaar (6705056).

Herren (figure 5) shows a multi-purpose construction assembly comprising a plurality of parallel vertical stud members (50) of equal length possessing a first terminal end and a second

Art Unit: 3637

terminal end, a means (10) for reinforcing the plurality of studs comprising a unitary elongated metal plate like member formed of a finite length defined by two parallel studs terminating in a first end and a second end (where 12 and 13 are located), the member possessing a first horizontal edge and a second horizontal edge between the first end and the second end, a first flange (16) extending perpendicularly upwards from the first end, the first end of the metal plate incorporates a pair of parallel notches (30) along the horizontal axis, the first and second horizontal edge of the plate are folded downward and perpendicular to the plate forming a first downward flange (21) and a second downward flange (22), the first flange being substantially longer than the second flange and the width of the first flange extends to and overlaps the adjacent parallel upright studs which define the width of the member located between each stud member.

Herren does not show a second flange extending perpendicularly upward from the second end to permit fastening to the adjacent stud, one or more horizontal or vertical expansion contraction means are slideably attached to said parallel stud members whereby the panel will be able to expand or contract in respect to horizontal or vertical environment forces and expanded or reduced to fit within a space without disassembling or cutting the assembly, one of the horizontal exapansion contracting means is slideably attached to the first terminal end of the parallel stud members and another is slideably attached to the second terminal end of the parallel stud members.

Tellenaar shows a second flange (31a, right) extending perpendicularly upward from the second end to permit fastening to the adjacent stud.

Application/Control Number: 10/600,806 Page 4

Art Unit: 3637

DiGirolamo et al discloses a expansion contraction means((12, 14) slideably attached to the first terminal end of the stud members.

Hatzinikolas discloses the studs being attached at the first and second terminal ends.

It would have been obvious to one having ordinary skill in the art at the time of the invention to modify Herren's structure to show a second flange extending perpendicularly upward from the second end to permit fastening to the adjacent stud as taught by Tellenaar, one or more horizontal or vertical expansion contraction means are slideably attached to said parallel stud members whereby the panel will be able to expand or contract in respect to horizontal or vertical environment forces and expanded or reduced to fit within a space without disassembling or cutting the assembly, one of the horizontal exapansion contracting means is slideably attached to the first terminal end of the parallel stud members and another is slideably attached to the second terminal end of the parallel stud members as taught by DiGirolamo et al, the anchor means being a second horizontal expansion contraction means slideably attached to the second terminal end of the parallel stud members because having a second flange extending upwardly from the second end would allow for the easy attachment of the second end to a stud as taught by Tellenaar, and having first and second horizontal expansion contraction means on the terminal ends of the studs would allow for the easy mounting of the studs which permits vertical and horizontal movement as taught by DiGirolamo et al and Hatzinikolas.

Per claims 11, 13-16, Herren as modified shows all the claimed limitations. The claimed method steps would have been the obvious method steps of constructing Herren's modified structures.

Response to Arguments

2. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Page 5

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art shows different braces and frame designs.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phi D A whose telephone number is 571-272-6864. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lanna Mai can be reached on 571-272-6867. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
